

# Contract Services – Hardware/Software Development

Extensive expertise in applying physics, mathematics, engineering, software, and chemistry to the development and volume manufacture of successful instruments and systems. Design and development skills include optics/lasers, electronics, mechanics, and software. Abilities include delivery of prototype and production systems.

## HW/SW Development Questionnaire

**Customer Information:**

Name: ..... Email: .....  
Company: ..... Phone: .....  
Address to be Automated: .....  
.....  
.....

**System to be Developed:**

.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....  
.....

**Function/Purpose of System to be Developed:**

.....  
.....  
.....  
.....  
.....  
.....

**Special Considerations:**

.....  
.....
